

ORIGINAL RANGE

316 Stainless Steel (HNSS):-

The Original Range Jubilee® hose clips with the highest corrosion resistance, our 316 (18/10) stainless steel Jubilee® clips, are the hose clip of preference in shipbuilding and maintenance when the highest level of corrosion resistance is demanded. Other areas where our Original Range 316 stainless steel clips are used are the food and chemicals industries, where highly corrosive acids can be present, and this material grade is also favoured by the oil and gas industry.

For larger sizes please contact us

Quality Assurance:-

Corrosion Resistance: 2000 hours NSS Test

Fastening: 7mm A/F screw

Industry Recommendations:-

SAE J1508 Surface Vehicle Standards-Hose Clamp Specifications, Type FE is referenced in the quality control methods for the design/manufacture of Original Range Jubilee Clips.

316 Stainless Steel

**The finest hose clip
in the world**
